**THE ISLAND**  
 of  
**BORNEO.**

S. Laid down from the Sooloo Reports

In this Map the Hills of Tawee Tawee, Timbagan, Sibeye, Manincollat & Baluan marked with points, are well determined from my own Observations. Kopyetogian is from C. Alver's bearings, Kulkassan by one bearing only of mine & Scotland by one of C. Alver's. The Easterns of Uhow Islands are laid down from two bearings of C. Alver, but both from Mast-head, at different Stations & without any Intercession. The other Places are from Sketches received from the Sooloo, but chiefly from the information of Bahatel an intelligent old Pilot. The A. Pocock & Gualdoro's Stations confine the Islands within certain Bounds to the Southward.

*N.B.* The Coast of BORNEO from Unfang Southward is not confirmed by any exact Observations but is laid down from a Sketch of Dato Saraphodin and from a Chart of Noquedah Koplo who came up that Coast in 1761. See Ameel and the Islands adjoining are laid down from a Plan taken aboard the Admiral-Pocock 1764. On the E.S. and S.W. of TAWEE TAWEE from Lapak to P. Gaya there is a Chain of Islands and many Shoals whose particular Forms and Situations are not known.
