

CHART  
of  
PULO PENANG,  
now  
PRINCE of WALES'S ISLAND :

compiled from various Surveys ;  
by A. Arrowsmith.

\* It is high water on the shore at the Fort Point, at half past 12 o'clock full & change, and it rises 8 and 1/2 feet in common spring tides: the flood runs to the southward and the ebb to the northward.  
The soundings are laid down at low water-spring tides.  
Variation in 1800 0° 26 West.
